“ From Cherry Sokoloski, Loveland, CO:
June was a friend I loved and appreciated. We shared a love of birds (especially cardinals!) and we would generally watch the same Nature shows on TV. Her family was of paramount importance to June, and I enjoyed hearing updates on the grandchildren. I also enjoyed June’s tales of her childhood in the “outback” of Canada, and how she walked miles to school with her sister. She started school at age 4 because she didn’t want to be left at home without her dear sister, a year older. She was also proud of her Campbell heritage, and claimed the Campbell Soup Can at the University Center for the Arts as her own. I hope she is now having reunions with beloved family and friends.
