“ Oh so sorry to his family. He was my boss at western mobil. We were the seal crack crew. 1st time I saw a mobile phone the size of clutch purse. At the time, Lewis and floorwax was on the radio with vibro Thursday. My job was to blow the cracks out with an Ingersoll rand generator thingy bob. You could win sports tix if you called in. I begged him but no, he never would use that fancy phone on the job. I felt like we had the best vibrator story of all time. That machine could rock! I was the only female on the crew. He took care of me pretty darn good. And another memorable moment was when I flew back to colo and he was taking care of my rototiller . I wanted to get it loaded into the uhaul but he really wanted to keep it. Well one thing lead to another and somehow through a night of bearing grease on the boat I was hauling back, I ended up greasing his entire garage including all tools he would touch and all the buttons on his radio. We had so much fun. Im so sorry he left us all to soon. I hope he is resting in peace and watching over all of us.

“ There is so many memories.. one memory was when we made a trip to deadwood. We seen so much and did so much and one comment you made was that you been there so many times but never seen so much as we did. That trip will never leave my heart.
