

Lewis Octive Grant

March 29, 1923 - July 29, 2013

"What it amounts to....." Lewis Octave Grant was born on March 29, 1923 in Washington, Pennsylvania. He passed away on July 29, 2013, following a severe fall. The son of Lewis Frederick Grant and Rita Jacquain Grant, a brother, Don and his wife, Joyce survive him. Lewis grew up in Henryetta, Oklahoma and served as a weather officer in both the Air Force and in the Field Artillery during World War II. In 1947 he completed requirements for a B.S. in Physics from University of Tulsa and then earned a Master's Degree in Atmospheric Science from the California Institute of Technology, Pasadena, California, 1948. Lewis married Patricia Lovelock Grant on July 23, 1949. In the early 1950's they moved to Colorado and eventually to Ft. Collins in the early 1960's. Their five children are Ann Grant Martin Karla, Brenda Jacquain Grant, Nancy Grant Mina, Andrew Lewis Grant Nick and Mike and Laura Lou Arnold Peter Pleban. Lewis has seven grandchildren and seven great-grandchildren. His German Shepard, Chip II will miss him greatly. He was preceded in death by his mother, father and wife, Patricia. After serving in World War II, he was part of a team that was instrumental in helping the new State of Israel to develop their water resources, particularly in the Negev desert. The men on his team became life-long friends. Prior to moving to Ft. Collins, Lewis worked for the American Institute of Aerological Research in the areas of water resources, agriculture, cloud physics and weather modification. In 1959, he joined the Engineering Department at Colorado State University in order to establish the Atmospheric Science Department. He was a CSU

Emeritus Professor from 1993 —1998. Internationally known for his pioneering research in Atmospheric Science, Lewis was also well respected in the field of agriculture. Aside from Atmospheric Science and farming, Lewis was active in the Ft. Collins community. He was awarded, as well as his son Andy years later, the Paul Harris Fellow award from the Rotary Foundation in appreciation of tangible and significant assistance for the furtherance of better understanding and friendly relations among peoples of the world. Boy Scout troop, 26 showed their thanks by giving Lewis an Appreciation award for his service as a Chartered Organization Representative. Lewis was a fellow of the American Meteorology Society, the Weather Modification Association and a past member of the American Geophysical Union. He is a past member of the cloud physics, water resources and weather modification committees of the American Meteorology Society. He has served as a member of the National Science Foundation Advisory Committee for Atmosphere Science, as the trustee from the university sector for the Weather Modification Association, and as the University representative and president of the Consortium for Atmospheric Resource Development. He is the author or co-author of over 100 publications and/or scientific conference papers. Several of the many awards Lewis received as an Atmospheric Weather Scientist included the Colorado State University Andrew Clark award for excellence in research, the Vincent Schaefer award of Weather Modification Association, the 1993 Colorado State University Dean's Council award, the 1976 Colorado State University Co-Interdisciplinary Environmental Research Award, and the Farm Bureau "Cloud Squeezer" award, 1977. As a Master Agriculturist, Lewis, with his son, Andy operated the first certified organic farm by the State of Colorado. He managed the farm operation that increased in size from 100 acres in the early 1960"s to about 2500 acres in 2011. Known as Grant Family Farms, the fields of vegetables were fully organic by 1987. He was the main force behind organizing many fall gleanings events on the farm. Hundreds of people, church groups and food banks came to harvest vegetables that were left in the fields. The farm contributed over 1 million pounds of food to the

Food Banks over the last many years. His activities and awards in the field of agriculture include being a section chairman of the National Academy of Science committee on Climate and Food, a board member of the Organic Farming Research Foundation, and a member of the Larimer County Agricultural Advisory Board. He has served as a consultant to the Colorado legislature and received the 1994 soil and water resources conservation award of the upper South Platte Watershed Association. Lewis was member of the Colorado IPM Advisory committee and a member of the National Horticulture Committee of the Farm Bureau. Lewis, known as "Lew" was known for his keen intelligence and clarity of communication. There were few conversations that weren't peppered with "The thing of it is" Most sentences began with "What it amounts to" and "so forth." These were quintessentially Lew. Possessing an active curiosity, he was interested in a wide range of topics and was always ready to give quality time to young people who often stayed with him at the farm. Always the teacher, there were many who learned the basics of organic farming and about his specialty, irrigation and water. He was an inspiration to all who knew him. Lew was especially fond and proud of his grandchildren and great-grandchildren with whom he spent quality time. The father of five, he was always ready to lend a hand to smooth the way. He never failed to support the challenging events of his children's lives in such a way that they knew they were loved and valued. Lew was a hard worker and dedicated napper. He was very active in his church, Westminster Presbyterian. He will be deeply missed by that congregation and many friends and colleagues. The community of this congregation has taken such great care throughout his life. A Memorial Service will be held at 3:00 p.m. on Friday at The First Presbyterian Church, 531 S. College Ave. Lew's family Memorial Contributions may be given to The Legacy Land Trust, legacylandtrust.org, 223 Linden St. Suite 200, Fort Collins, Colorado 80524 in the name of Lewis O. Grant to further the mission of creating lands perpetually used as farmland and natural land. To CELEBRATE Dad's life, we invite all to

come to the farm 172 Starbright Ct, Wellington surrounded by the land he loved and cared for. The celebration will begin immediately after the service. Please bring bountiful potluck food to share with each other; all else will be provided.

“ *I am so sorry of hear of Lew's passing. I visited him during the Atmospheric Science Department's 50th anniversary last summer. He gave Johanna and I a super tour of the farm, and I saw how proud he was of the farm and Andy's running of it. I worked for Lew as a field hand for several summers on his Ft Lupton farm when I was in high school and early college, and he was the impetus for my becoming an atmospheric scientist and teacher. He was a wonderful man with so many interests who connected so well with people from various walks of life. A great teacher and lifelong character model for me.*

“ *I was saddened to hear of Lew's passing. I did my Master's Thesis under Lew at CSU graduating in 1985. I will always remember him for his patience, kindness, guidance, and incredible knowledge of Weather Modification. Lew and Patty were a wonderful couple and always showed Lew's students great hospitality and kindness. Please accept my sincere condolences.*

“ I am so sorry for your loss. Knowing Lew for many years through the Atmospheric Science Department I was touched by the time and attention he gave me. He always greeted me warmly and left me with a word of encouragement. I could listen to Lew for hours talk about his weather and farming experiences. I will miss this dear friend and feel blessed to have known him. May your memories of good times together and your faith in a benevolent GOD sustain you in the days ahead. With deepest sympathy, Paul C.
