“ I worked with Bob at CSU's Printing Services from the late 1980s until 2000. He used to try to tell me a joke - something about two skunks "making love" and I would cut him off and tell him that animals didn't "make love" they just mated. Guess I'll never hear the punch line on that joke.

*Bob was a good person to work with - a pain in the ass occasionally - but generally good.*

“ I always enjoyed saying hello to Bob and catching up on family news when I stopped in at Printing & Publications. Don worked with Bob for many years and they had many good co-workers/friends at CSU, some of have also left this earth. It was a privilege to know Bob and I wish him family healing during this hard time.
